- **Standing out for its commitment to sustainability, the company has been recognised in Standard & Poor's "Sustainability Yearbook 2022" as the third most sustainable company in the hospitality industry worldwide.**

**London, February 3rd, 2022** - NH Hotel Group has received the Bronze distinction for its excellent sustainability performance for the second consecutive year. The company has been included in "**The Sustainability Yearbook 2022**", published annually by S&P Global, as the third most sustainable company in the world within the hotel sector.

In this edition, S&P Global evaluated economic, environmental and social aspects of more than 7,500 companies from 61 sectors around the world. Of the 716 companies included in this edition, 26 are Spanish companies. Within the hotel sector, 42 companies have been evaluated, of which only 6 have achieved the best scores and have been included in the 2022 yearbook. Among them stands NH Hotel Group, which has maintained its third position as the most sustainable hotel chain. The report highlights that "the record number of committed companies worldwide reflects the growing importance of sound sustainability practices and the need to advance in a more demanding regulation to achieve the proposed objectives".

In the words of Ramón Aragonés, CEO of NH Hotel Group: *"this recognition highlights NH Hotel Group's commitment to making sustainability a strategic and growth value for the Company, a value that we share with Minor Hotels, of which we are part, and which has also been included in the Yearbook 2022. As we have done so far, we will continue to work with a holistic vision to fulfil our commitment to integrate responsible business management in the economic, social and environmental spheres and to become a benchmark in sustainability within the sector"*.

## About NH Hotel Group
